

## Dedicated training aligned to ClimateSmart Cities Assessment Framework

The Climate Centre for Cities has developed 22+ training across 5 themes of the ClimateSmart Cities Assessment Framework (CSCAF) with an intent to build local capacities for adopting climate relevant measures. Climate Alliance partners - GIZ India, WRI India, Clean Air Asia, RMI India and ISGF have supported in developing some of the modules. First round of the online training cycle was completed last month and saw participation of city officials from 41 cities across the country. The focus was to provide technical know-how in transitioning to cleaner energy; increasing the adoption of green buildings; rejuvenating water bodies, open areas and increasing green cover; safeguarding biodiversity; building disaster resilience; mainstreaming climate action plans; transitioning to low carbon mobility; improving air quality; strengthening flood risk management; enhancing water resources and supply management and increasing efficiency in water and waste-water management.

Launch video - [https://youtu.be/r95Ej\\_tac4w](https://youtu.be/r95Ej_tac4w)

Officials from various cities in the country attended the training sessions.

Exercise on Google Earth to map green Cover in cities.

Interactive exercise on Miro to make sessions engaging for participants.

### PODCAST

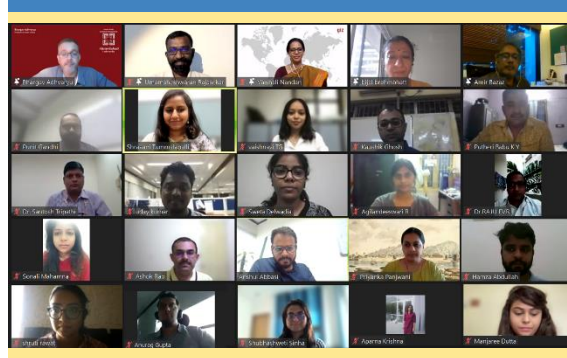

#### Understanding the Future Podcast

In the next podcast, Climate Centre for Cities talks to **Benjamin Hickman** from **UN Environment Programme** to understand the future of District Cooling in Cities.

In this episode, he explains the technicalities of District Cooling as well as how it can be implemented in the Indian Context.
