

A COLLECTION OF IDEAS TO HELP DESIGN UNIVERSALLY ACCESSIBLE AND INCLUSIVE CITIES

PROVISIONS FOR INCLUSIVE CITY DEVELOPMENT

- Availability of accessible, safe, affordable and clean serviced apartments for independent living.
- Mass housing units to include universal design facilities as per Harmonized Guidelines with accessible infrastructures like electricity, water, sanitation and solid waste disposal.
- Integration of reliable mechanisms for crowd management through volunteers and/or architectural measures like separate entry/exit and queuing areas etc.
- Availability of accessible and safe tourist destination that is connected by accessible, safe and inclusive transport.
- Provision of 'Inclusive City Mobility Plan' for the city that connects all areas and services by accessible bus service ensuring adequate frequency
- Availability of affordable bus services for all users and accessible (digital) payments
- Availability of separate cycle tracks on busy urban roads (as per IRC recommendations) with an affordable bike hiring facility and provisions of movement of assistive mobility devices.
- Availability of wheelchair charging stations at convenient locations
- Availability of schemes for vulnerable groups to avail financial help for business/self-employment through various modes
- Availability of accessible website, as well as accessible one-stop information centre (in each ward) to appraise people on available employment and schemes
- Availability of affordable internet packages for the vulnerable groups through CSR.
- Availability of accessible options for participation by vulnerable groups in citizen feedback surveys associated with urban planning and development
