

CLIMATESMART ALLIANCE: LEVERAGING PARTNERSHIPS TOWARDS URBAN CLIMATE ACTION IN INDIA

As the National Secretariat of the ClimateSmart Alliance, C-Cube is engaging with a range of stakeholders and institutions for **cohesive and collaborative initiatives towards mainstreaming climate resilience in India's urban discourse**. It is intended that these partnerships will bring together the diverse skills, strengths and resources for implementing projects, sharing knowledge and good practices and scaling up transformative action to address the increasing climate risks in our cities.

More than 45 national and international organizations have expressed their interest to collaborate with C-Cube and support cities in implementation of the ClimateSmart Cities Assessment Framework (CSCAF) 2020. Out of which 23 organizations have formally come on board as ClimateSmart Alliance Members

We are really happy and excited to announce bringing in Alliance Partners by signing of new Memorandums of Understanding with the **International Urban Cooperation (India)**, **Public Health Foundation of India**, **Integrated Research and Action for Development**, **The Energy and Resources Institute**, and **Energy Systems Catapult**.
