List of Figures
Technical Notes

**Average Annual Growth Rate**: It is the compound annual population growth rate

**Crude Birth Rate**: Number of live births per thousand population

**Current Daily Activity Status**: The activity pattern of the population, particularly in the informal sector, is such that during a week, and sometimes, even during a day, a person could pursue more than one activity. Moreover, many people undertake both economic and non-economic activities on the same day of a reference week. The current daily activity status for a person was determined on the basis of his/her activity status on each day of the reference week using a priority-cum-major time criterion (day to day labour time disposition).

**Crude Death Rate**: Number of deaths per thousand population

**Current Weekly Activity Status**: The current weekly activity status of a person is obtained during a reference period of 7 days preceding the date of enumeration. A person was considered working (or employed) if he/she, while pursuing any economic activity, had worked for at least one hour on at least one day during the 7 days preceding the date of enumeration.

**Dwelling Unit**: Dwelling unit is the existing house accommodation available to the household for residential purposes.

**Households with Access to Bathroom**: In this survey, a bathing place which satisfies the criteria of a room is considered as a ‘bathroom’. An enclosed area without a roof used for bathing purposes or any living room/ kitchen used for bathing purpose will not be considered as a bathroom.

**Households with Drainage Facility**: Households having either closed or open drainage connectivity for waste water outlet

**Infant Mortality Rate**: Number of infant deaths (<1 year) during the year per thousand live birth during that year, or (Number of infant deaths during the year / Number of live births during the year) * 1000.

**Labour Force**: Persons who are either ‘working’ (or employed) or ‘seeking or available for work’ (or unemployed)

**Labour Force Participation Rate (LFPR)**: LFPR is defined as the percentage of persons in the labour force in the population.

\[
LFPR = \frac{(\text{Number of employed persons} + \text{Number of unemployed persons})}{\text{Total population}} \times 100
\]

**Latrines by Types**:
- **Pit Latrine**: These latrines are attached to a pit that is dug into the ground for receiving human excreta.
- **Water Closet Latrine**: Sanitary water flush latrines are those that have water closets fitted with flushing cistern. Such latrines may be connected to a septic tank or an underground sewerage system. Human excreta from these types of latrines is removed without the need for scavenging.
- **Other Latrine**: This category includes service latrines, latrines serviced by animals such as pigs, etc. and all latrines other than the pit and the water closet types of latrine. Service latrines are dry type of latrines from where human excreta is removed by scavengers.

**Level of Urbanization**: It is the percentage of urban population to total population in a reference year.

**Literacy Rate**: Percentage of literates to the total population aged 7 years and above. As per Census of India, a person aged seven and above who can both read and write with understanding in any language, is treated as literate.

**Natural Growth Rate (Population)**: The difference between Crude Birth Rate and Crude Death Rate
Net Migration Rate: Net migration rate is defined as the in-migration rate minus out-migration rate. Migration in this context refers to only international migration.

Principal Source of Drinking Water: Information in respect to the household’s principal source of drinking water will be collected in this item. The principal source of drinking water refers to the source from which most of the drinking water for the household was obtained during the last 365 days.

Population Growth Rate: Population growth rate can be defined as average annual exponential growth rate of population.

Room: A constructed area with walls or partitions on all sides with at least one door way and a roof overhead.

Living Room: A room with floor area (carpet area) of at least 4 square metres (i.e., approximately 43 square feet), a height of at least 2 metres (i.e., approximately 6.6 feet) from the floor to the highest point in the ceiling and used for living purposes will be considered as a living room. Thus, rooms used as bedroom, sitting room, prayer room, dining room, servant’s room - all are considered as living rooms provided they satisfy the size criterion.

Other Room: It is a room which does not satisfy the specification of 4 square metres floor area and 2 metres height from the floor to the highest point of the ceiling, or a room which, though it satisfies the specification, is not used for living purposes.

Statutory Towns: It is the urban area with a municipality, corporation, cantonment board or notified town area committee.

Structure of the Dwelling Unit:

Katcha Structure: Katcha structure is one, which has walls and roofs made of non-pucca materials.

Pucca Structure: Pucca Structure is one whose walls and roof are made of pucca materials.

Semi-Pucca Structure: It is one in which either the walls or the roof (but not both) are made of pucca material. Walls/roof made partially of pucca material are regarded as Katcha walls/roof.

Tenure Status: A dwelling unit is the accommodation used by the household for its residential purpose. The tenure status of the dwelling unit indicating the type of possession of the household on the dwelling unit gets recorded in this item in terms of the following categories:

Owned: A dwelling unit is considered to be ‘owned’ by the sample household if permanent heritable possession with or without the right to transfer the title is vested in a member or members of the household.

Hired (Including Employer’s Quarter): If the dwelling unit in which the sample household lives is provided to a member of the sample household by his/her employer, the dwelling unit will be considered as ‘employer quarter’. If the dwelling unit is taken on rent, by the sample household, which is payable at monthly, quarterly or any other periodic intervals or on lease, for a period of less than 30 years, it will be treated as a hired dwelling unit.

Houseless: Households living more or less regularly under staircases, in tents, in pipes, under bridges, or purely temporary flimsy improvisations built by the roadside (which are liable to be removed at any moment) are considered to have no dwelling.

Others: All the other types of possession types (including encroachment)

Unemployment Rate (UR): UR is defined as the percentage of persons unemployed among the persons in the labour force.

\[ UR = \left( \frac{\text{No of unemployed persons}}{\text{Number of employed persons plus number of unemployed persons}} \right) \times 100 \]

Urban Area: Census of India defines urban area as:

A. All places with a municipality, corporation, cantonment board or notified town area committee, etc.
B. All other places which satisfy the following criteria:
   i. A minimum population of 5,000,
   ii. At least 75% of male working population engaged in non-agricultural pursuits, and
   iii. A density of population of at least 400 persons per square kilometre.
Urban Rural Growth Difference: It is a method of measuring the tempo of urbanisation and projecting it is based in the difference between urban and rural population growth and its logistic transformation.

Usual Activity Status: According to the usual status, workers are those who perform some work activity either in the principal status or in the subsidiary status. The two categories of usual activity status are as under:

Usual Principal Activity Status: The usual activity status relates to the activity status of a person during the reference period of 365 days preceding the date of enumeration. The activity status on which a person spent relatively longer time (i.e. major time criterion) during the 365 days preceding the date of enumeration is considered as the usual principal activity status of the person.

Usual Subsidiary Activity Status: A person whose usual principal status was determined on the basis of the major time criterion could have pursued some economic activity for a shorter time throughout the reference year of 365 days preceding the date of enumeration or for a minor period, which is not less than 30 days, during the reference year. The status in which such economic activity pursued was the subsidiary economic activity status of that person.

Work: Work is defined as participation in any economically productive activity. Such participation may be physical or mental in nature. Work involves not only actual work but also effective supervision and direction of work. It also includes unpaid work on farms and enterprises.

Workers (Based on Types of Employment):
- **Casual Wage Labour**: A person casually engaged in Other’s farm or non-farm enterprises (both household and non-household) and getting in return wage according to the terms of the daily or periodic work contract is defined as a casual wage labour.
- **Regular Salaried/Wage Employee**: Persons working in others farm or non-farm enterprises (both household and non-household) and getting in return salary or wages on a regular basis (and not on the basis of daily or periodic renewal of work contract) are defined as regular salaried/wage employees.
- **Self-employed**: Defined as persons who operate their own farm or non-farm enterprises or are engaged independently in a profession or trade on own-account or with one or a few partners are self-employed in household enterprises. The essential feature of the self-employed is that they have more autonomy and economic independence.

Worker Population Ratio (WPR): WPR defined as the percentage of employed persons in the population.

\[ WPR = \left( \frac{\text{Number of employed persons}}{\text{Total population}} \right) \times 100 \]
