

## CONTEXT

Managing urban rivers in a **holistic manner** is a relatively new and evolving field in India. Until now, the emphasis has solely been on controlling pollution. While this is undoubtedly important, there are several other environmental, economic and social aspects that need to be considered as well.

To address this gap, in November 2020, the National Institute of Urban Affairs (NIUA) and the National Mission for Clean Ganga (NMCG) developed a unique framework for managing urban river stretches called the **Urban River Management Plan (URMP) framework**.

It is expected that a number of cities will adopt this framework to prepare their city-specific URMPs in the next few years.

This training program is to build the capacities of interested stakeholders in the knowledge and application of this framework.

**Your application should include your CV and a letter of interest expressing how the training will benefit you**

**Apply By : 20th March 2022**

# Training Programme on PREPARING URBAN RIVER MANAGEMENT PLANS

19th – 20th April 2022  
India Habitat Centre, New Delhi

## TARGET PARTICIPANTS

- Planners & practitioners involved with river management
- Trainers associated with national urban missions like AMRUT 2.0, SBM 2.0, Smart Cities Mission etc.
- Academicians and researchers

## BENEFITS

**Successful participants will:**

- Be issued a certificate endorsing their capability to prepare a URMP
- Added to a resource pool of experts to work with cities that will prepare URMPs

Planning and Project Interventions

Environmental

Economic

Social

- There are no fees for the training. Training material, lunch, coffee/tea for the workshop is free.
- Lodging and boarding shall be provided for upto three days only to participants from outside Delhi. However, participants are requested to make their own travel arrangements.
