

Date: 14-15 July 2022 | Venue: Delhi

CONTEXT

River cities are special. A river is perhaps the greatest natural asset of a city. The range of ecosystem services it provides a city, and the livelihoods it supports, are truly substantial. It, therefore, makes good sense for river cities to have a harmonic relationship with their rivers to ensure they continue to remain special.

The theme of this training programme is centered on precisely this notion. It emphasizes the role of a Master Plan of a city to facilitate this harmony. The programme will introduce participants to the typical river-related challenges faced in cities and explain how a city's Master Plan can help address those challenges through seven planning avenues/instruments.

TARGET PARTICIPANTS

- Consultants & practitioners involved with the preparation of Master Plans
- Officials of the Planning Department in river cities
- Academicians and researchers

Participants will be issued a certificate by NIUA and NMCG upon successful completion of the training.

APPLICATION DETAILS

- DEADLINE: 24 June 2022
- Submit your CV along with a letter of interest expressing how this training will benefit you
- Send your application at urvers@niua.org
- Only shortlisted candidates will be contacted

Note: The programme is based on national guidelines prepared by the National Institute of Urban Affairs (NIUA) and the National Mission for Clean Ganga (NMCG) for 'making river-sensitive Master Plans". The guidelines have been sent to all States and Union Territories, with the directions to apply them in new Master Plans or when updating the existing ones.

- There are no training fees. Training material is also free. Lunch & tea will be served at the training venue.
- Accommodation and breakfast will be provided to participants from outside Delhi NCR for up to three days. However, all
 participants are requested to make their own travel and dinner arrangements.
- NIUA encourages female candidates to apply.
