

PROJECT IN FOCUS: MASTER PLAN DELHI 2041

NIUA is preparing the Master Plan for Delhi 2041 as an enabling strategic plan in collaboration with the Delhi Development Authority. The Plan intends to provide the much-needed blueprint for holistic and sustainable growth of the city, while addressing aspects like economy, shelter, mobility, environment, urban services, natural and cultural heritage, public spaces, waste management, community engagement, etc. For more information on the project click [here](#).

Consultation workshop with youth for draft Master Plan Delhi -2041 to vision a youth-friendly Delhi.

Participatory approach and stakeholder engagement

Creation of a robust monitoring and evaluation framework

A blueprint of inclusive and sustainable growth for other Indian cities

Environmentally sensitive planning for resilient development

Strategizing housing supply, facilitating access to social infrastructure and leveraging Delhi's heritage and culture

Sustainable and affordable mobility strategies for all to encourage walkability and accessibility

Key directions that define the process adopted for preparing Master Plan Delhi 2041

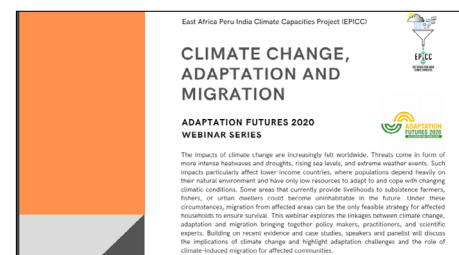

Online certification course on Faecal Sludge and Septage Management

Join NIUA's pilot certificate course available on National Urban Learning Platform to address the emerging need for Faecal Sludge and Septage Management towards citywide sanitation management and gain in-depth knowledge including technological options supported by successful case studies in Indian context. To register, click [here](#).

Webinar on Climate Change, Adaptation and Migration

Adaptation Futures 2020's webinar on Climate Change, Adaptation and Migration explored the linkages between climate change, adaptation and migration bringing together policy makers, practitioners and scientific experts. One of the speakers in the webinar, NIUA's Prof. Debolina Kundu discussed that forced migrants in urban areas in India tend to move to informal settlements where things are already difficult for them. There is a need for an integrated approach while looking at impacts of displacement especially in urban areas.

NIUA and Namami Ganga's Urban River Management website launched

NIUA and Namami Ganga Mission have jointly developed a website, which is a one stop destination for knowledge on urban river management and was launched on the occasion of Ganga Utsav on 9 December in the presence of Hon. Minister of Jal Shakti, Sh. Gajendra Singh Shekhawat. To know more, visit the website [here](#).
